

**OMV Petrom general comment on the final draft of the Tariff Code – Alexandroupolis – LNG Terminal proposed by the Operator of the Alexandroupolis Independent Natural Gas System, Gastrade S.A. and subject to public consultation by RAE – The Regulatory Authority for Energy in Greece**

**General comment:**

1. Referring to the Tariff Code, we can issue a general comment, meaning that any tariff and any applicable tax can only be commented, once the tax regime applicable to all LNG terminal fiscal operations is set. We have been informed that an alignment process with regards to the fiscal operations is ongoing between Gastrade and the Greek fiscal authorities.  
Once this alignment process is finalized, we kindly ask you to restart the public consultation on this document.
